## Hadrian's Solid Plastic Toilet Partitions

Hadrian's solid plastic partitions offer the utmost in strength and durability. Available in polypropylene (HDPP) or polyethylene (HDPE) material, doors, panels and pilasters are all 1" (25mm) thick. Our commitment is to take an industry standard and make it better through outstanding service. With reliable lead times and exceptional shipping programs, Hadrian's solid plastic partitions are a fantastic value.

We are committed to offering the **very best value** in the industry

### Why Choose Hadrian's Solid Plastic?

Hadrian's solid plastic partitions are the ideal choice for high abuse facilities such as schools, stadiums, parks and airports. Hadrian's partitions are designed to stand strong and overcome abuse. They will not delaminate, dent, flake, crack, rust, or break!

From a maintenance point of view, nothing could be easier! Hadrian's solid plastic partitions practically take care of themselves. They never need to be repainted and there is no need to ever replace rusted, dented or damaged parts.

# The Hadrian Advantage

## Superior Service

When you choose Hadrian, you get more than great toilet partitions – you also get outstanding Hadrian service. We are committed to offering the very best value in the industry. This means: great products, superior service and fast, dependable lead times. Hadrian’s stock 5-day shipping program (with no upcharge!) leads the industry and demonstrates our unrivaled commitment to our customers. Let us perform for you!

## No “Ghosting”

Hadrian’s solid plastic partitions offer excellent graffiti resistance. Polyethylene (HDPE) meets industry standards for graffiti removal, while polypropylene (HDPP) exceeds them, allowing most graffiti to be cleaned without leaving a “ghost” behind.

## Industry Leading Warranty

With the best warranty in the business, Hadrian is confident that its partitions will stand the test of time. Hadrian’s solid plastic warranty is good for 20 years and protects against breakage, delamination, and corrosion.

## Environmentally Friendly

Hadrian’s solid plastic is an environmentally responsible choice. In addition to having an excellent recycled content, the long life span of plastic means that less material is used over time as facilities do not need to replace compartments every few years.

# Partition Styles

## Headrail Braced

Headrail braced compartments are a great choice for virtually any facility. These units are especially recommended in heavy-use areas such as schools, institutions and industrial settings. The anti-grip top rail deters boisterous activity while ensuring a rigid and secure installation.

## Ceiling Hung

Ceiling hung units present a clean contemporary appearance. They permit quick, easy floor maintenance, especially when combined with wall-hung fixtures. Ceiling hung partitions are recommended for modernization where a drop ceiling or open span construction can be used.

## Floor to Ceiling

Floor to ceiling units are extremely strong and resistant to abuse as they are securely connected to the floor, ceiling and walls. This configuration is ideal for high abuse areas and installations that require extra durability.

## Screens

### Wall Mounted Screen

- Simple and economical design
- Permits easy maintenance and floor cleaning

### Floor Mounted Screen

- Supported by a 5" (127mm) floor mounted pilaster
- Great option for vandal prone installations

# Solid Plastic – Hardware

Hadrian's solid plastic toilet partitions are available with a variety of hardware options to meet the challenges of any washroom environment.

## Standard Hardware

- Heavy-duty aluminum 8" (203mm) round barrel hinges
- 6" (152mm) aluminum stop & keeper
- Black anodized latch (with emergency access feature)
- Full height aluminum channels at panel to pilaster connection
- Three heavy-duty aluminum brackets at panel to wall and pilaster to wall connections.
- Plastic pilaster shoes (color to match partitions)

## Stainless Steel Hardware (#4 brushed finish)

- Full height stainless steel channels at panel to pilaster, panel to wall, and pilaster to wall connections
- Stainless steel latch
- Stainless steel stop & keeper
- Stainless steel shoes

## Plastic Hardware

- Full height plastic channels at panel to pilaster, panel to wall, and pilaster to wall connections
- Finish to match partitions

## Continuous Hinge

Hadrian's heavy-duty 16-gauge continuous hinge is a great choice for heavy-use facilities such as schools and institutions. This 54" (1372mm) high stainless steel hinge covers the full height of the door and features a stainless steel hinge pin. Fastened to both the door and pilaster with 6-lobe security head stainless steel through-bolts, the continuous hinge is a true heavy-duty option. As an added bonus, this item also acts as a no-sightline feature on the hinge side of the door.

## Fasteners

Fasteners are theft-proof 6-lobe security head stainless steel screws to deter vandalism.

### **Headrail**

Hadrian's easy-to-install "cap-over" headrail ensures a rigid finished installation. For joining two pieces together, the headrail system features a convenient snap-fit design that does not require extra fasteners.

### **Shoes**

Durable and easy to maintain, Hadrian's 4" (102mm) high plastic shoes are available in finishes to match our solid plastic partitions (polypropylene only). Shoes are also available in a #4 brushed stainless steel finish (which is standard for polyethylene partitions).

### **Vanities**

Made from the same durable material as our partitions, Hadrian's solid plastic vanities are available in a number of different sizes and configurations to meet installation requirements. Vanities include the following as necessary: tops, backs, skirts, sides, gussets, "L" angles, anchors and fasteners.

### **Finishes**

Hadrian's solid plastic toilet partitions are available in a variety of designer colors to suit any environment. Please refer to Hadrian's Solid Plastic Color Selector for details.

## **Integral Hinge**

Hadrian's easy-to-install integral hinge projects a clean, uncluttered appearance. The hinge pin and bottom cam are recessed into the door and pilaster to eliminate the need for exposed fasteners on the hinge side. Inconspicuous and virtually maintenance-free, the integral hinge is a great alternative to Hadrian's standard wrap-around offering. Integral hinge is available for headrail braced style only.
